

AUDIOREFURB 3

AudioRefurb provides a large selection of audio enhancement filters and effects, all accessed through one very easy to use window. Multiple, discretely animated panels provide intuitive access to audio filters such as graphic equalizers, delay, distortion, bandpass, peak limiting, reverb and many more. Use it to convert audio

to 5.0, 5.1 or 7.1 surround sound too, using the simple channel layout panel.

AUDIOREFURB 3
